

Gutmann  
for perfect performance

The GREY SHARK drive board

Holds out extremely and  
releases gently

# The Gutmann GREY SHARK drive board

The drive face of GREY SHARK consists of unique new plastic formulation. It makes the drive board resistant to chemicals and it almost has an unlimited service life. The innovative geometry of the “dual row harpoons” grants a high robustness together with optimum protection of the cleaning pads.

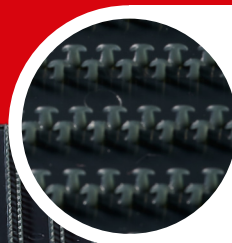

**Together with GREY SHARK your machine will be cleaning more than masterfully.**

The patented laser-welding process guarantees a sealed unit of highest strength. GREY SHARK is sterilizable and autoclavable.

It is especially suitable in hygienically sensitive areas.

**With GREY SHARK your machine becomes even more eco-friendly.**

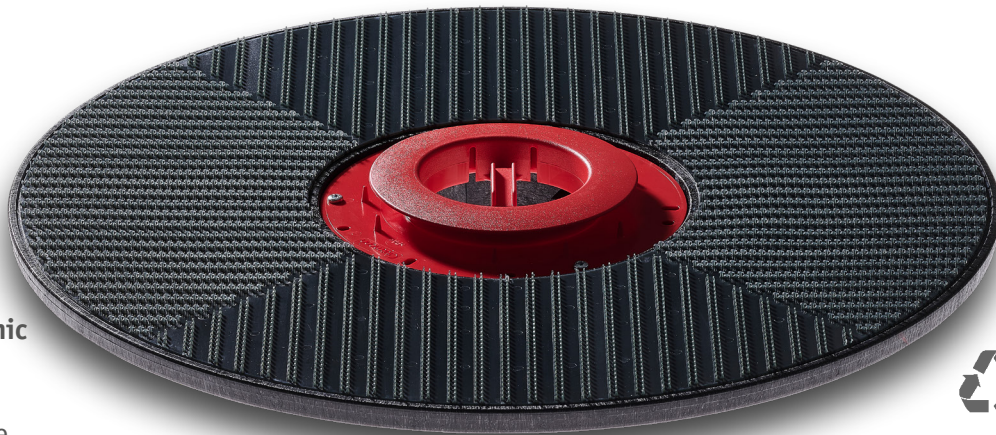

Due to innovative materials and production methods GREY SHARK is manufactured environmentally compatible as well as 100 % recyclable.

High robustness by an exceptional geometry of the “dual row harpoons”.

# The Gutmann added value for your machines

**Offer optimal benefit to your customers:**

**Use in hygienic areas**

- sterilizable
- autoclavable

**Intelligent technology  
for firm hold and gentle  
release**

**Laser-welded components**

- high-strength and sealed unit
- no adhesives

**Highly resistant to  
chemicals**

**100 % recyclable**

## Your innovations are our challenge

We give support with our competence and experience and we support you in developing suitable components for your new cleaning concept.

## The best performance for your machine

We adapt our products perfectly to your machine with excellent properties for your competitive advantage.

## Flexible structures for an economical production

A flexible manufacturing structure allows us the efficient and economical production of prototypes, small, medium and large series.

## Fast and reliable response times

Our lean organization as well as a close relationship to our customers allows us to react quickly to new situations.
