

# Drive plates WHITE BEAR

Hybrid system for flexible pad adhesion for eccentric and orbital machines.

GUTMANN QUALITY for a longer service life, best performance and high economic efficiency.

## Highlights

- Unique plastic formulation with innovative geometries (dual row flukes) specially designed to meet the requirements of oscillating cleaning equipment
- The hybrid system:
  - Pad holder: with innovative harpoon drive face geometry for standard pad-backed floor cleaning pads
  - Velcron: With fine micro studs for cleaning pads with velour backing
- Highly resistant to chemicals and robust

## Areas of application

- For driving all standard pads on oscillating cleaning machines

## Technische Daten

### Technical data

Length/Width/Height	≤ 1000 mm / ≤ 500 mm / –
Diameter	≤ 600 mm

### Body

Material	–
Colours	black

### Pad holder covering

Material	–
Colours	Standard colour white, special colours possible

### Connection

Connection	Individual adaptation to the drive plate of the eccentric or orbital machine
